

## Female entrepreneurs benefit from .tel with Seed Network

**LONDON, United Kingdom – 8<sup>th</sup> May, 2009:** Telnic Limited ([www.telnic.org](http://www.telnic.org)), the registry operator for the new communications-focused .tel top level domain (TLD), is pleased to announce today that the Seed Network ([www.seednetwork.com](http://www.seednetwork.com)), Lynne Franks' community for Women's Enterprise, has joined the .tel community.

Seed Network is partnering with Domainmonster.com ([www.domainmonster.com](http://www.domainmonster.com)), which will be donating £2.00 to charities supporting women for every domain sold to Seed Network entrepreneurs and associates. Additionally, Seed Network members will benefit from a £2.00 discount on the price of .tel domains purchased from Domainmonster.com.

Lynne Franks, founder of Seed Network, explained: "A partnership between my SEED community of women entrepreneurs and .tel will ensure that both personally and professionally our members can be accessible and contactable very easily as well as having their search engine maximisation shoot through the roof. .tel also enables SEED women to find the necessary business resources that they need, too – a win-win situation."

Justin Hayward, Communications Director at Telnic Limited, added: "Telnic is delighted to welcome the Seed Network into the .tel community. Telnic and the Seed Network have a strong alignment in terms of their vision for helping people collaborate, communicate and get mutual benefit out of doing business, and we're looking forward to developing this relationship further to help the female entrepreneurs of the Seed Network get the most out of the internet with .tel."
